

K-LOVE FM provides christian rock music which I have not found on any other station. KLove also provides information and toll-free numbers for people in need of changing their lives, getting help or counselling, or just in need of encouragement. I found much needed help with stress when my nephew's drug use changed him into a paranoid, and self-destructive addict. Knowing I could ask for prayer anytime, day or night, helped me so much. This community needs KLOVE and the service they provide. Allowing LPFM stations to take priority over current FM translator services would, in my opinion, be a great mistake.
